

ALARM CLOCK PROJECT

1. Objective

To create a simple alarm clock using Python.

2. Software Used

- Python
- VS Code

3. Modules Used

- time
- winsound

4. Features

- Set alarm time
- Check current time
- Alert when time matches

5. Working

1. User enters alarm time.
2. Program checks current time continuously.
3. When current time equals alarm time, an alarm sound is generated.

6. Output

The system alerts the user at the specified time.

7. Conclusion

This project demonstrates the use of loops, time functions, and user input in Python.
